# Chillax

## SUGGESTED USE

- ▶ Horses that are anxious or spooky
- ▶ Horses that are overly excitable or tense
- ▶ Horses that require additional concentration
- ▶ Horses struggling to cope in their environment (busy yards / frequent travelling)
- ▶ Horses on box rest or reduced turn out
- ▶ Horses showing stereotypical behaviours (vices)

## HOW TO USE

Give orally.

Give 20ml approx. 90 mins before a stressful activity

Dose can be revised upwards to 60ml as necessary.

## AVAILABLE SIZES

3 DOSE SUPPLY

SUITABLE FOR  
ALL HORSES  
(> 3 MONTHS OF AGE)

## KEY PRODUCT FEATURES

- ▶ **Fish protein hydrolysate** aids the reduction of stress & anxiety by lowering corticosteroid levels
- ▶ **Chelated magnesium & Vitamin B6** to help calm the nervous system
- ▶ Highly palatable **Apple flavour**

## DID YOU KNOW?

Some horses are naturally nervous, while others become anxious in specific situations such as travelling, competing, or during sales. Each horse has a unique threshold for reacting to these scenarios, requiring a supplement that can adapt to a variety of circumstances. **Chillax** is formulated to calm your horse, helping them focus without losing their 'vital edge'.
