

PERFORMANCE

EnerGene-Q10

Powdered supplement to raise levels of CoQ10 in muscle cells to help promote cellular energy levels at peak performance. Aids recovery after intense exercise.

NUTRIGENOMIC
SUPPLEMENT

HIGHLY
BIOAVAILABLE

SOURCE OF
MICROACTIVE® CoQ10

EnerGene-Q10

SUGGESTED USE

- ▶ T:T type horses
- ▶ For horses in hard training / with a heavy competition schedule
- ▶ For horses that perform in stamina demanding disciplines (e.g. racehorses racing >1.5 miles / trotting horses / endurance horses / event horses)
- ▶ For horses with muscular disease (e.g. RER or PSSM type I or II)
- ▶ For horses experiencing GGT syndrome

HOW TO USE

Give daily, in feed or orally (dissolves in water).

Horses & ponies > 300kg:

25g (1 scoop)

Horses & ponies < 300kg:

12.5g (1/2 scoop)

AVAILABLE SIZES

LASTS 60 DAYS

LASTS 30 DAYS

SUITABLE FOR ALL HORSES

KEY PRODUCT FEATURES

- ▶ EnerGene-Q10 is **the world's first** nutrigenomic supplement for horses
- ▶ Contains **Microactive CoQ10®** which has been proven to be more absorbable than other forms
- ▶ CoQ10 promotes a recycling effect on the **Vitamins C & E** thus increasing their antioxidant action

DID YOU KNOW?

Research shows that horses with the genotype T:T (suited to exercise requiring stamina), produce significantly lower levels of CoQ10 than the other (C:C and C:T) genetic types, but that these levels can be restored with supplementation.

Increased levels of CoQ10 help with more efficient energy production, delayed onset of fatigue during exercise, an improved response to exercise training and enhanced recovery following intense exercise.
