Shake well before use.
Give daily, orally or in feed.

Horses & ponies > 300kg: 15ml

Horses & ponies < 300kg: 7.5ml

AVAILABLE SIZES

LASTS 166 DAYS

LASTS 66 DAYS

**SUITABLE FOR
ALL HORSES**

KEY PRODUCT FEATURES

- ▶ **MHB3® Hyaluronan** to aid joint lubrication and enhance healthy function
- ▶ Olive Leaf extract or **Hydroxytyrosol** which has powerful antioxidant properties
- ▶ Has been proven through clinical and pre-clinical research to have positive effects in as little as 21 days.

DID YOU KNOW?

Flexyl HA contains **MHB3® Hyaluronan**, which is a patented high molecular weight hyaluronic acid (HA) which holds 8 US patents and is more easily absorbed by the horse.

HA is an important component of cartilage AND synovial fluid. It acts as a binding and lubricating agent and shock absorber in the joint and also provides a natural anti-inflammatory effect. It increases the viscosity of the synovial fluid – so the “shock absorber” located between the cartilage encased bone ends is thicker and more able to bounce back from impact.
