Hoofcare

SUGGESTED USE

- ▶ For long term use to support hoof growth & strength
- ▶ For horses that suffer from brittle hooves / pull shoes regularly
- ▶ Horses with hooves prone to cracks
- ▶ When accelerated hoof growth is required
- ▶ For youngstock undergoing remedial hoof care
- ▶ When environmental conditions are especially wet or dry

HOW TO USE

Apply to hooves daily; use a soft brush to rub into the coronary band and cover all of hoof wall, can also be applied to sole.

Note: For optimal results a minimum of 12-16 weeks continuous use is recommended.

KEY PRODUCT FEATURES

- ▶ **Moisturising agents & Oils** prevent the hoof from drying out, helping strengthen the hoof wall
- ▶ Provides a **natural sheen** to the hooves

DID YOU KNOW?

That equine hoof grows on average 1cm a month; therefore, it takes approximately 9-12 months for a horse to grow a whole new hoof from the coronary band to the ground. It is recommended that horses with problem hooves have **Hoofcare** applied daily for optimal hoof health.
