Neutragast Pellets

SUGGESTED USE

- ▶ Competition horses
- ▶ Horses on a high concentrate / low forage diet
- ▶ Horses under stress
- ▶ Poor doers or horses with reduced appetite
- ▶ Horses with digestive issues / recurrent colic
- ▶ Horses recovering from illness / injury or surgery
- ▶ Horses that have been treated with anthelmintics / antibiotics
- ▶ Highly strung horses
- ▶ Horses with loose +/- smelly droppings

HOW TO USE

Give daily to help maintain gastrointestinal health.

Horses & ponies > 300kg:

150g (1 scoop)

Horses & ponies < 300kg:

75g (1/2 scoop)

Each scoop contains approx. 150g

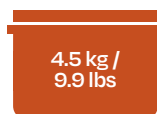

KEY PRODUCT FEATURES

- ▶ ***Lithothamnium calcareum*** or calcified (Irish) seaweed as a highly effective buffer for gastric acid
- ▶ ***Saccharomyces cerevisiae*** or active yeast to support the 'good' bacteria in the hindgut
- ▶ Essential amino acids including **Threonine** which aids the production of mucus which lines and protects parts of the gastrointestinal tract, incl. the glandular part of the stomach

DID YOU KNOW?

Lithothamnium calcareum or calcified seaweed (Maerl) has a natural honeycomb structure which breaks down slowly – providing long lasting buffering effect. It is much better than traditional ant-acids calcium carbonate or sodium bicarbonate, when it comes to neutralising stomach acid.

AVAILABLE SIZES

LASTS 30 DAYS

**SUITABLE FOR
ALL HORSES
(> 3 MONTHS OF AGE)**
